- Dialectical Behavior Therapy (DBT)
 - Cognitive Behavioral Therapy (CBT)
 - Acceptance and Commitment
Therapy (ACT)
 - Eye Movement Desensitization and
Reprocessing (EMDR)
 - Psychiatric Medication Evaluation
and Management

Psychotherapy

THE SOCIAL INTEGRATION MODEL™ DIFFERENCE

At the heart of our programs is our Social Integration Model, during which therapists enact real-time therapeutic interventions while their clients experience real-life situations. The Social Integration Model is used to ensure social and life skills treatment concepts are not only presented and reviewed, but are experienced in the moment. Professional guidance is then provided to help clients implement their newly learned skills.
